

743 Encanto Dr.
Calexico, Calif.
April, 6, 1958

Dear Sir:

I am sorry I did not get out Friday's batch out on time, but I wanted to get some information on a Curandera who has been making quite a name for her self by practicaly making miracles. She has been known to cure the blind and make the - cripple walk again. In fact she cured the Governor of Baja California from some kind of stomach trouble that Doctors had - not been able to cure. She also takes care of his family. For this the Governor gave her a two story house and a brand new - Pick-up truck.

I went out Sunday morning to try to see her, but I just wasted my time. According to the receptionist I have to - get up very early in the morning, he suggested around four A.M. so that I could get there on time and get a number check so -- that I could await my turn to see her. She only gives out thirty-five of these checks daily. Another thing also is that I ha ve to have a recommendation from some patient of the curandera and that I have to sign a statement not blaming the curandera - if she cannot cure me or if something should happen to me. Her charge is sixty Pesos a visit. (\$4.80 in U.S.). If you wish on your next visit to the I.V. we can go and try to see her.

Here are some more suggestion on what you might add to the questionaire:

To questions 29, 35, 37 lets add INDIGESTION, AGRURAS and CON-
GESTION, which are different forms of stomach trouble. On ques-
tion 37 lets add the word SOVADOR, which is a person who specia-
lizes on dislocated bones. On question 30 lets add descansar,
which means rest, as one of the selections.

I still have more suggestions, but I think they can wait until you get here so that we can give the questionare a - real going over.

Best regards to the family.

yours Truly.
